2005 Rolls Out Newsworthy Projects!

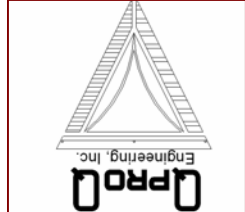

QproQ Engineering, Inc. has been mentioned in the "Times Leader" repeatedly this year. Beginning with an interview in January titled "Engineering Expansion". This interview focused primarily on a project for the **West Palm Beach Veterans Affairs Medical Center**. QproQ Engineering, Inc. was selected as Prime Design Consultant for the VAMC's heli-stop design. This project entailed design for an elevated heli-stop located at the existing emergency entrance of the hospital in West Palm Beach, FL. Since January; articles regarding other QproQ projects like; **Mission Foods** Production Facility and **Graham Packaging Company** Bottle Conveyor Bridge, have been seen in the Times Leader. As we roll into our fall season, 2005 continues to bring forth challenging and rewarding projects to QproQ. We here at QproQ Engineering, Inc. look forward to our future civil/structural engineering endeavors.
